

RingCentral Recommended Routers

Summary RingCentral has tested and approved QoS-enabled routers for optimum network performance. These routers include Adtran, ASUS, Buffalo, Cisco, D-link, Linksys, NetGear, and SonicWall.

RingCentral has tested and approved the QoS-enabled routers for use with RingCentral VoIP services. These devices have Quality of Service (QoS) settings enabled in order to give priority to voice traffic which ensures the highest quality for your VoIP calls.

Here's a list of [RingCentral Recommended Routers](#).

Details Network administrators may also refer to the [RingCentral Router Configuration](#) guide.
